# SECURITY

## ABSOLUTE POWER PROTECTS ABSOLUTELY

The ideal security system is one you never notice until the time comes for it to do its job. At RESIDENTIAL SYSTEMS, INC., we design your system to be as simple and invisible as possible while providing high-level safety and peace of mind.

- 
- Answer and operate the front door and front gate from any telephone in the home
  - View and control security cameras from TVs, touchscreens or remotely through the Internet
  - Allow a guest or tradesperson selective home access without ever giving them a key
  - Monitor gas and water systems, with automatic shut-off if leakages occur
  - View the location of security or fire alerts from a single, integrated control screen
  - Integrate with lighting control to turn on interior lights and flash those on the exterior in the event of an emergency
- 

The kids have burned their toast again, activating the smoke detector which immediately disengages potentially dangerous systems such as gas heating or air conditioning. While you are thankful for the safety precautions, you also appreciate the visual monitors to verify there is no fire and the integrated controls to reactivate all systems at the touch of a button.
